

Selecting All

Use the **Edit** menu to select all objects that match the active tool in the Toolbox.

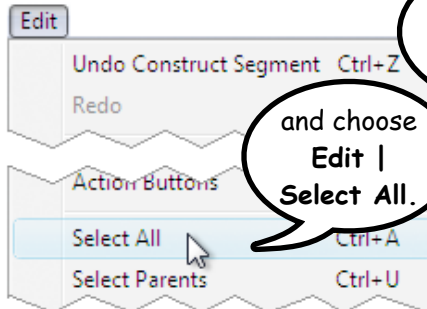

©2009 Key Curriculum Press

Select All Objects

$m \overline{AB} = 0.78 \text{ cm}$

Choose the
Arrow tool...

and choose
**Edit |
Select All.**

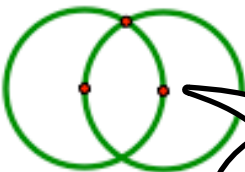

Now you can drag
or apply a command
to everything.

$m \overline{AB} = 0.78 \text{ cm}$

Try **Edit |
Clear Objects.**

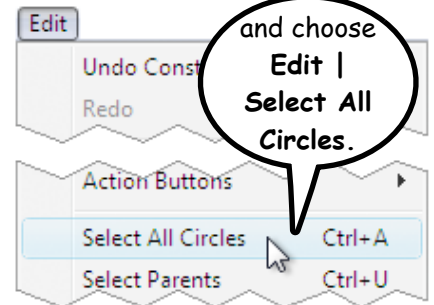

Select One Kind of Object

Suppose you are
constructing an
equilateral
triangle.

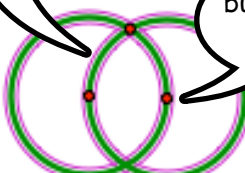

Choose the
Compass
tool...

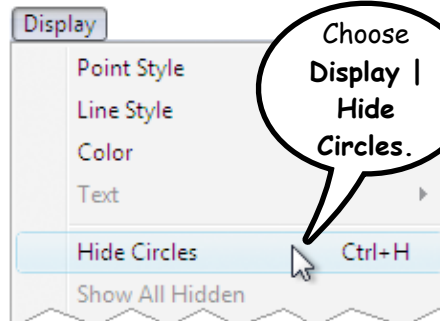

and choose
**Edit |
Select All
Circles.**

All circles in
the sketch are
selected...

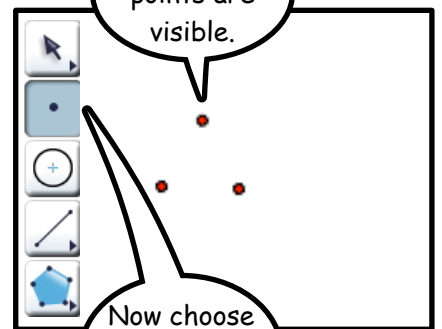

but not the
points.

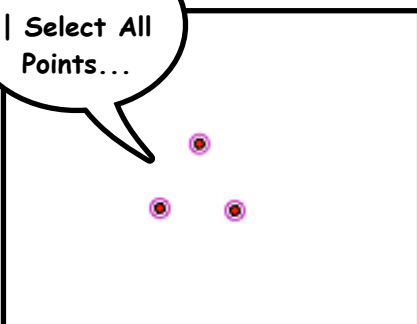

Choose
**Display |
Hide
Circles.**

Only the
points are
visible.

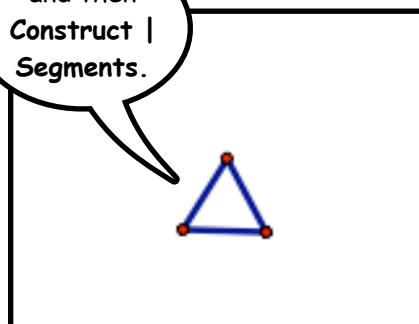

Now choose
the **Point**
tool...

choose **Edit
| Select All
Points...**

and then
**Construct |
Segments.**

You can select all lines,
rays, segments, polygons,
text, or markers in the
same way.
