## Show All Hidden Objects

Here is a cube.  
How was it  
constructed?

All hidden  
objects are  
shown and  
selected.

If you want  
to hide the  
objects  
again...

Choose Edit  
| Undo Show  
Objects.

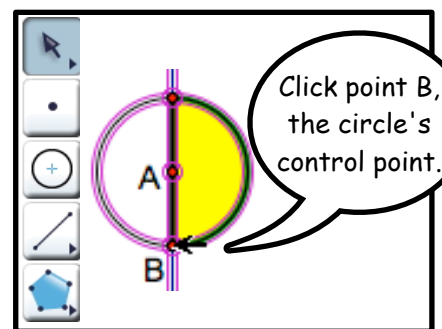

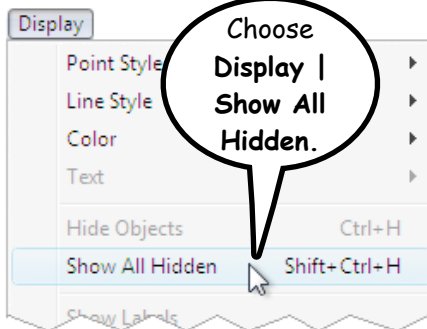

The objects  
are no longer  
shown.

## Show Some Hidden Objects

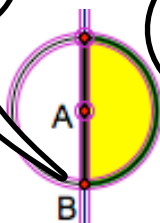

Suppose you  
want to change  
the size of your  
semicircle...

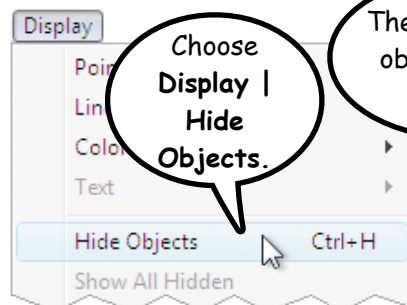

but the  
circle's points  
are hidden.

Point B is now  
deselected...

and the other  
objects are  
still selected.

The deselected  
object is still  
shown.

Now you can  
drag point B to  
change the  
size.
