

# Making Movement Buttons

Move points by using **Edit | Action Buttons | Movement**.

©2009 Key Curriculum Press

Select two points in order.

The first will move.

The second is the destination.

Choose Edit | Action Buttons | Movement.

Select a speed...

and then click OK.

A button shows up.

Press the button and...

Point A moves to point B.

You can move several points at a time.

Select, in order, points C and E...

and then points D and F.

Make a button.

You can hide points E and F...

Point C moves to point E...

and point D moves to point F.

and then press the button.
