

Creating and Editing Functions

Create a Function

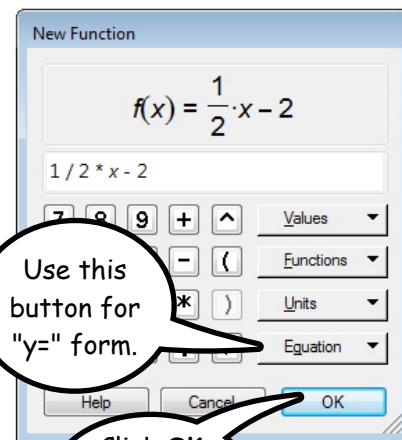

Choose Number
| New Function.

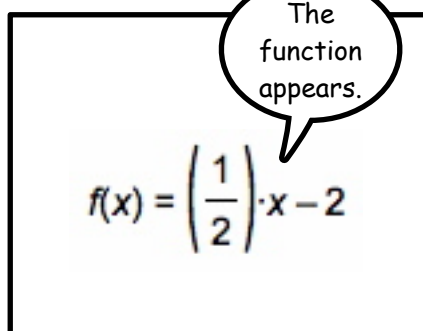

Use this keypad or
your computer's
keyboard.

Here's
the x key.

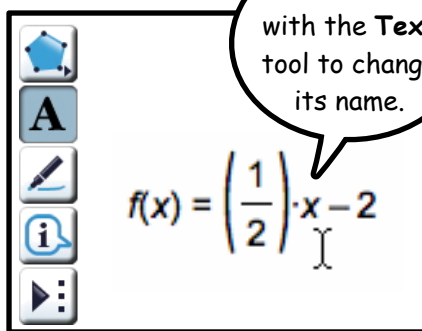

Use this
button for
"y=" form.

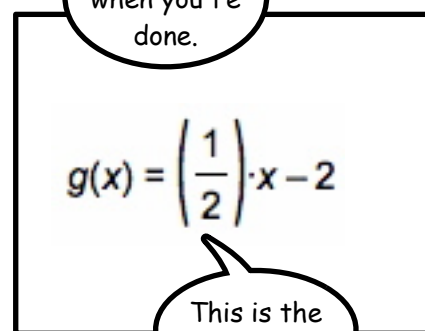

Click OK
when you're
done.

The
function
appears.

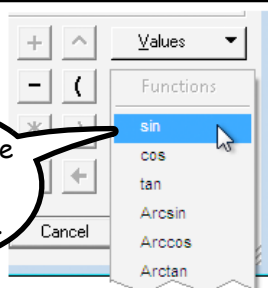

Double-click
with the Text
tool to change
its name.

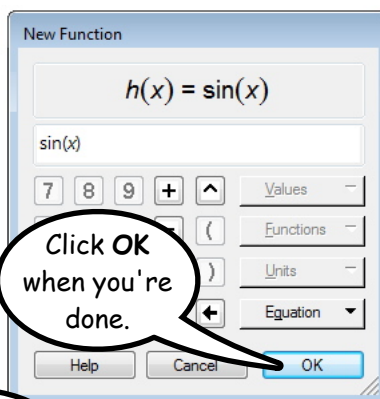

This is the
result.

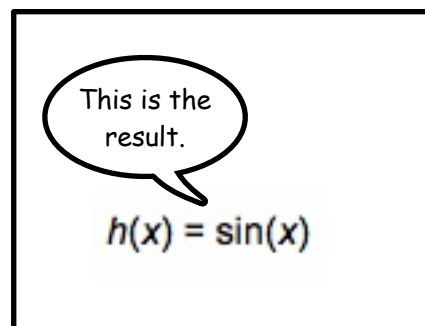

Use Built-In Functions

You can use
built-in
functions.

Click OK
when you're
done.

This is the
result.

Edit a Function

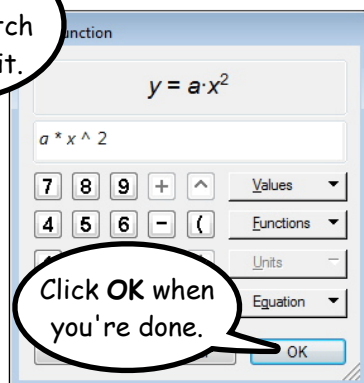

To edit a
function...

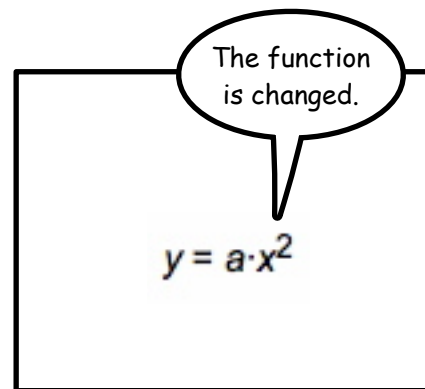

double-click
with the
Arrow tool.

Click a value
in the sketch
to insert it.

$a = 2$

Click OK when
you're done.

The function
is changed.
