

Using the Point Tool

Construct points with the Point tool.

©2009 Key Curriculum Press

Construct a Point

Choose the
Point tool...

click in empty
space...

and a point
appears.

The outline
means it's
selected.

Keep clicking to
construct more
points.

Construct a Point on an Object

Move the Point
tool over an
object.

Click when the
object is
highlighted.

Drag the new point
with the **Arrow** tool.
It stays connected.

Connect points
to segments,
rays, and lines...

to circles
and arcs...

even to
polygons and
loci!

Construct a Point at an Intersection

Move the Point
tool over an
intersection.

Click when
both objects are
highlighted.

When
you
drag...

The point
stays at the
intersection.
