

Using the Polygon Tool

Construct polygons with the **Polygon** tool.

©2009 Key Curriculum Press

Construct a Polygon

Choose the **Polygon** tool...

and click to place a polygon vertex.

Click again to place the next vertex.

Keep clicking to place the other vertices.

Click the first vertex again...

to finish the polygon.

You can click on points that already exist...

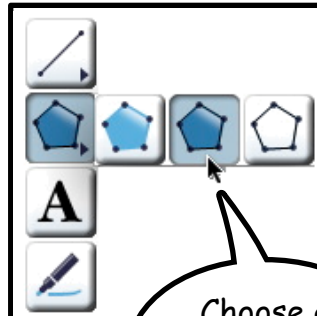

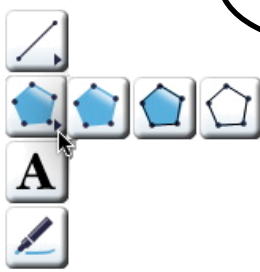

to use them as vertices for a polygon.

Use a Different Polygon Tool

Press and hold the tool icon...

and a menu pops out.

Choose a different **Polygon** tool.

This tool makes a polygon with segment edges.

This tool makes the edges only...

without constructing the actual polygon.
